

DRINKING WATER WARNING

FAILURE OF A FILTRATION OR DISINFECTION PROCESS

**ESTE INFORME CONTIENE INFORMACION IMPORTANTE ACERCA DE SU AGUA POTABLE.
HAGA QUE ALGUIEN LO TRADUZCA PARA USTED, O HABLE CON ALGUIEN QUE LO ENTIENDA.**

Freelan Municipal Authority is experiencing operational conditions that compromise the water quality.

BOIL YOUR WATER BEFORE USING

On 5/18/19, operational plant conditions or deficiencies were identified at The Reservoir System Disinfection.

These deficiencies include:

Chlorine residual did not meet PADEP requirements.

There is an increased chance that the water may contain disease-causing organisms.

What should I do?

DO NOT DRINK THE WATER WITHOUT BOILING IT FIRST. Bring all water to a boil, let it boil for one minute, and let it cool before using, or use bottled water. Boiled or bottled water should be used for drinking, making ice, brushing teeth, washing dishes, and food preparation **until further notice**. Boiling kills bacteria and other organisms in the water.

Inadequately treated or inadequately protected water may contain disease-causing organisms. These organisms include bacteria, viruses, and parasites which can cause symptoms such as diarrhea, nausea, cramps, and associated headaches.

These symptoms above are not caused only by organisms in drinking water. If you experience any of these symptoms and they persist, you may want to seek medical advice. Guardians of infants and young children and people at increased risk, such as pregnant women, some of the elderly and people with severely compromised immune systems, should seek advice from their health care advisors about drinking this water.

What is being done?

The distribution system is currently being tested for bacteria.

We will inform you when you no longer need to boil your water.

For more information, please contact: Freeland Municipal Authority
